With us. We leave that for these "Hoop-la" clothing dealers with their bruss band and spangles and glitter and glare. We conduct our business on a different system. When we sell you a suit of Clothes there is only one profit to pay, because we manufacture our stock ourselves; when you buy manufacture our stock ourselves; when you buy Eastern-made clothing you pay the manufacturers' profit and you pay the re-tailers' profit, and in the case of some of them, you pay for the side-show attachments too. Put on your thinking cap and it won't take you long to comprehend the truth of what we say. Just now the only profit you pay to us is a very small one; in fact, since we cut down prices we have not been able to see any at all. "What is one man's loss is another's gain."

all crops have grown poorly, and are ver-unevent.

The acreage of wheat was about equal to last year, and would no doubt have been a splendid sucess but for the freeze in March. The late sowing has done better than the early. The early sowing was better advanced, and much of it had jointed when the freeze came, and being very sappy, was more seriously affected. The crop has been saved in splendid condition, and threshing is now in full blast and the yield, as far as determined, is not exceeding 55 per cent of last year, some crops more and some less. There is a good deal of complaint of rast and cockel. The best down yield. The best and is in the best wheat sections have produce some fine crops, but they are the exceptions. I will be able to give about the exact average per acre when the threshers' books are returned.

the threshers' books are returned.

Cons.

The area of this crop was full average or 55 per cent, of last year, which was 105. It was planted two or three weeks later than useal. The stand was generally fairly good, but it has grown uneven and was controlled by the same conditions governing other spring crops. The drouth which prevailed all over the State until the 25nd of July, seriously stanted the growth, and the case was stanted the growth, and the case was stanted the growth, and the case was the standard of the standard of the same of the best corn years known to the State.

The tobacco market has been exceedingly interesting this week. The offerings have contained more fine tobacco and brought more high prices than perhaps was ever known since war prices prevailed. Before the rain of Wednesday morning, speculative excitement was increasing rapidly, and but for the rain, the market would have been wild before the week was out. The feeling after the rain however showed that the market was not, by far, a speculative one only, but that speculation was only an incident of the demand and comparatively an antistic product of the demand and comparatively and the special was a superior of the special way to the special way to be a superior of the special way to the special way to be a superior of the special way to be a superior of the special way to the special way the special way to the spe Tallow.
